Introduction

Index Objective

Each S&P Shariah Index is designed to measure the performance of Shariah-compliant companies from an existing S&P index (the "Underlying Index").

Index Family

In 2006, S&P Dow Jones Indices introduced the S&P Shariah Indices. Shariah is Islamic canonical law, which observant Muslims adhere to in their daily lives. Shariah has certain strictures regarding finance and commercial activities permitted for Muslims.

The S&P Shariah Indices include the following:

- S&P 500 Shariah
- S&P Europe 350 Shariah
- S&P Global 1200 Shariah
- S&P Japan 500 Shariah
- S&P/TOPIX 150 Shariah
- S&P/TSX 60 Shariah
- S&P BRIC Shariah¹
- S&P Global Infrastructure Shariah
- S&P GCC Shariah
- S&P/IFCI LargeMidCap Shariah
- S&P China LargeMidCap Shariah 10% Capped
- S&P Pan Arab Shariah
- S&P Global BMI Shariah
- S&P Global Property Shariah
- S&P Pan Asia Shariah
- S&P Frontier BMI Shariah
- S&P BSE 500 Shariah
- S&P South Africa Composite Shariah
- S&P GCC Composite Shariah Dividend Index
- S&P Pan Arab Composite Shariah Dividend Index
- S&P High Yield Dividend Aristocrats Shariah

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

Supporting Document	URL
S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology	Equity Indices Policies & Practices
S&P Dow Jones Indices' Index Mathematics Methodology	Index Mathematics Methodology
S&P Dow Jones Indices' Float Adjustment Methodology	Float Adjustment Methodology
S&P Dow Jones Indices' Global Industry Classification Standard (GICS) Methodology	GICS Methodology

¹ For information on the S&P BRIC Shariah please see the S&P BRIC Shariah Methodology document located on our Web site, www.spdji.com.

This methodology was created by S&P Dow Jones Indices to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices so that the index continues to achieve its objective.

Eligibility Criteria

Shariah Screening

S&P Dow Jones Indices has contracted with Ratings Intelligence Partners (RI) to provide the Shariah screens and filter the stocks based on these screens. Ratings Intelligence Partners is a London/Kuwait-based consulting company specializing in solutions for the global Islamic investment market. Its team consists of qualified Islamic researchers who work directly with a Shariah Supervisory Board, which is a board of Islamic scholars serving to interpret business issues and recommend actions related to business decisions for the indices. The members are:

- Dr. Muhammad Ali Elgari – PhD in Economics from the University of California, U.S.A.
- Dr. Nazih Hammad – PhD in Islamic Law from the University of Cairo, Egypt.
- Dr. Mohammad Amin Ali-Qattan – PhD in Islamic Banking, University of Birmingham, United Kingdom.
- Dr. Mohd Daud Bakar – PhD from the University of St. Andrews, United Kingdom.

Sector-Based Screens

Business activities related to the following are excluded:

1. Advertising
 - Advertisers of pork, alcohol, gambling, tobacco and all other non-Islamic activities
 - Advertising means and modes which contravene the tenants of Islam
2. Media & Entertainment
 - Producers, distributors and broadcasters of music, movies, television shows and musical radio shows
 - Cinema operators
 - Exceptions:
 - News Channels
 - Newspapers
 - Sports Channels
 - Children's Channels
 - Educational Channels
3. Alcohol
4. Cloning
5. Financials, except:
 - Islamic Banks
 - Islamic Financial Institutions
 - Islamic Insurance Companies
 - Defined as a company having:
 - Shariah Committee to supervise all activities
 - All products are Islamic
 - All investments of the company are Islamic
 - Passes accounting based screens

6. Gambling
7. Pork
8. Pornography
9. Tobacco
10. Trading of gold and silver as cash on deferred basis

During the selection process, each company's latest financial statement is reviewed to ensure that the company is not involved in any non-Shariah compliant activities, regardless of whether the latest statement is a quarterly, semi-annual or annual statement. If the latest statement is available in all three of these frequencies an annual statement will likely be used, as these are more likely to be audited. Those that are found to be non-compliant are screened out. The above industries are not considered Islamic and would not be appropriate for investment for observant Muslims.

Accounting-Based Screens

After removing companies with non-compliant business activities, the remaining companies are examined for compliance with certain financial ratios. Three areas of focus are leverage, cash, and the share of revenues derived from non-compliant activities. All of these are subject to evaluation on an ongoing basis.

Stocks deemed compliant at the prior evaluation period that exceed the maximum ratio for any accounting-based screen at the current evaluation period remain compliant if the ratio is within two percentage points of the maximum allowed. However, if the maximum is breached for three consecutive evaluation periods the stock will be deemed non-compliant. If any of the ratios are above the two percentage point buffer limit, the stock is deemed non-compliant immediately.

Stocks deemed non-compliant at the prior evaluation period that pass all accounting-based screens at the current evaluation period remain non-compliant if any ratio is within two percentage points of the maximum allowed. However, if the stock satisfies all three ratios for three consecutive evaluation periods the stock will be deemed compliant. If all three ratios are below the two percentage point buffer limit, the stock is deemed compliant immediately.

Such accounting-based screens are not applicable to companies which are run on a fully Shariah compliant basis and such companies shall be considered compliant. Such companies may be characterized by (the list below is indicative, non-exhaustive and reviewed on a case to case basis):

- Having a Shariah Supervisory Board
- All transactions (business and financial) are in accordance with Shariah principles
- Incorporated and managed in a fully Shariah compliant manner

Leverage Compliance. This is measured as:

Debt / Market Value of Equity (36 month average) < 33 %

Cash Compliance. Certain rules related to cash holdings must be met. These are:

Accounts Receivables / Market value of Equity (36 month average) < 49 %

(Cash + Interest Bearing Securities) / Market value of Equity (36 month average) < 33%

Revenue Share from Non-Compliant Activities. In certain cases, revenues from non-compliant activities can be tolerated, if they comply with the following threshold:

(Non-Permissible Income other than Interest Income) / Revenue < 5%

Dividend Purification Ratio. This ratio is provided to investors for purification purposes, it is calculated as:

Dividends * (Non Permissible Revenue / Total Revenue)

Index Eligibility

Generally, stocks are first constituents of an underlying index. The underlying index is screened for Shariah compliance, with only compliant stocks remaining in the Shariah index. The table below lists those indices in the family that are Shariah screens of an underlying index:

Index	Underlying Index
S&P 500 Shariah	S&P 500
S&P Europe 350 Shariah	S&P Europe 350
S&P Global 1200 Shariah	S&P Global 1200
S&P Japan 500 Shariah	S&P Japan 500
S&P/TOPIX 150 Shariah	S&P/TOPIX 150
S&P/TSX 60 Shariah	S&P/TSX 60
S&P GCC Shariah	S&P GCC
S&P/IFCI LargeMidCap Shariah	S&P/IFCI LargeMidCap
S&P Pan Arab Shariah	S&P Pan Arab
S&P Global BMI Shariah	S&P Global BMI
S&P Global Property Shariah	S&P Global Property
S&P Frontier BMI Shariah	S&P Frontier BMI
S&P BSE 500 Shariah	S&P BSE 500
S&P South Africa Composite Shariah	S&P South Africa Composite
S&P High Yield Dividend Aristocrats Shariah	S&P High Yield Dividend Aristocrats
S&P BRIC Shariah	S&P BRIC
S&P Global Infrastructure Shariah	S&P Global Infrastructure
S&P China LargeMidCap Shariah 10% Capped	S&P China LargeMidCap

Each of the underlying indices has its own eligibility criteria.

For details on the eligibility requirements of the underlying indices, please refer to their respective methodology documents.

The following indices in the index family are not simple Shariah screens of an underlying index.

S&P BRIC Shariah. Please refer to the index's methodology document for more information on the eligibility for this index.

S&P China LargeMidCap Shariah 10% Capped. The index's eligible universe is the S&P China LargeMidCap Index, updated at each rebalancing of the S&P China LargeMidCap. All stocks in the eligible universe are then screened for Shariah compliance.

S&P Global Infrastructure Shariah. The index's eligible universe is the Selection Universe of the S&P Global Infrastructure Index, updated at each rebalancing of the S&P Global Infrastructure Index. All stocks in the eligible universe are then screened for Shariah compliance.

For information on the rebalancing frequency of the S&P Global Infrastructure Index, please refer to S&P Dow Jones Indices' S&P Thematic Indices Methodology document, located on our Web site, www.spdji.com.

S&P Pan Asia Shariah. The index's eligible universe is the top 15 largest components by float-adjusted market capitalization, within each country of the S&P Pan Asia BMI (excluding Australia, Japan, and New Zealand), and is updated annually with a reference date as of the last business day of August. All stocks in the eligible universe are then screened for Shariah compliance.

S&P Shariah Dividend Indices. To qualify for membership, a stock must satisfy the following criteria during the index rebalancing:

- Be a constituent of the respective underlying index as detailed in the table below.

Index	Underlying Index
S&P GCC Composite Shariah Dividend Index	S&P GCC Composite Shariah Index
S&P Pan Arab Composite Shariah Dividend Index	S&P Pan Arab Composite Shariah Index

- Have increased dividends or maintained stable dividends every year for at least three consecutive years.
- Have a maximum 100% and non-negative dividend payout ratio for new index constituents and a non-negative dividend payout ratio for existing index constituents.
 - The dividend payout ratio is calculated as the annual Dividend Per Share divided by the annual Earnings Per Share, using data from each company's most recent fiscal year as of the rebalancing reference date.
 - A dividend payout ratio is considered negative when the annual Earnings Per Share (EPS) is negative.
- Have an average daily value traded (ADVT) of at least US\$ 0.2 million for the three-months prior to the rebalancing reference date.

Dividend Payment Types

S&P Dow Jones Indices only considers cash dividend payments declared as regular by the paying company for index eligibility, selection, and weighting purposes. Cash dividend payments declared as special by the paying company, including recurring special cash dividends, are not considered. Dividend amounts are before application of withholding taxes.

Index Construction

Approaches

The S&P Shariah Indices are calculated using a base-weighted aggregate methodology. This means the level of an index reflects the total float-adjusted market value of all of the component stocks relative to a particular base period. The total market value of a company is determined by multiplying the price of its stock by the number of shares available after float adjustment.

The S&P Shariah Dividend Indices are calculated based on a non-market capitalization weighting scheme using the divisor methodology used in S&P Dow Jones' equity indices. Constituents are weighted based on indicated annual dividend yield. At each rebalancing, stocks are weighted and assigned index shares based on closing prices nine calendar days prior to the rebalancing effective date. Since index shares are assigned based on prices nine calendar days prior to the rebalancing, the actual weight of each stock at the rebalancing differs from these weights due to market movements.

The S&P High Yield Dividend Aristocrats Shariah Index is calculated in the same manner as the S&P High Yield Dividend Aristocrats Index.

For more information on the calculation of the S&P High Yield Dividend Aristocrats Index, please refer to the methodology document located on our Web site, www.spdji.com.

Please refer to the Index Mathematics document for details on index level calculations.

S&P Shariah Dividend Indices. Eligible stocks are ranked by indicated annual dividend yield; the 30 highest yielding stocks become the constituents of the respective S&P Shariah Dividend Index, subject to a minimum of two stocks per country if there are two or more eligible stocks from that country.

- To ensure full regional representation in the S&P Pan Arab Composite Shariah Dividend Index, if there are no eligible constituents for a member country, the eligibility requirements for that country are relaxed as follows:
 - The requirement to maintain stable or increasing dividends is reduced from three years to two.
 - If, following the above rule relaxation there are still no eligible constituents, the three month ADVT requirement is reduced from US\$ 0.2 million to US\$ 0.1 million.
 - If, following the above rule relaxations, there are still no eligible constituents from an unrepresented country, no further relaxations will be made and the country will remain unrepresented in the index.

The reference date for indicated annual dividend yield, float-adjusted market capitalization, and average daily value traded is the close of the month prior to the rebalancing month. All dividend criteria are based on regular cash dividends as determined by S&P Dow Jones Indices.

S&P Dow Jones Indices believes turnover in index membership should be avoided when possible. If a current index constituent of an S&P Shariah Dividend Index is among the top 35 ranking stocks by indicated annual dividend yield during the index rebalancing, the stock remains in the index (i.e., a 35 stock buffer). Conversely, a non-constituent stock ranking among the top 25 will replace the lowest-ranked current constituent. If the number of eligible stocks is less than the target of 30, then constituents of the respective underlying index with a history of increased or stable dividends for more than two years, and satisfying all other index eligibility criteria, are added in decreasing order of indicated annual dividend

yield until the target constituent count of 30 stocks is reached. If the target constituent count is not met at this point the index can contain less than 30 companies.

The S&P Shariah Dividend Indices' rebalancings are effective after the last business day of July.

If an index constituent is deleted from the respective underlying index (due to a corporate action, monthly Shariah compliance review, etc.), it is also simultaneously removed from the S&P Shariah Dividend Index.

The composition of each S&P Shariah Dividend Index is also reviewed in January, April and October, where constituents are screened to ensure their continuous payment of dividends. Any index constituent which has omitted its most recent dividend is removed from the index. If the number of constituents is less than 25, the index undergoes a rebalancing using the same criteria as the regular annual rebalancing. In such cases, the rebalancings are implemented after the close of the last business day of January, April and October. The reference date for the universe, float adjusted market capitalization and average daily value traded is the close of the month prior to the rebalancing month. The reference date for all other data is the close of the month prior to the July rebalancing.

Constituent Weighting

All S&P Shariah Indices are weighted by float-adjusted market capitalization, with the following exceptions:

- **S&P Shariah Dividend Indices.** The indices are weighted by indicated annual dividend yield.
- **S&P South Africa Composite Shariah Capped Index** and **S&P Global Infrastructure Shariah Index.** Constituents' are weighted by float-adjusted market capitalization, subject to a cap of 10% of the total index weight.
- **S&P China LargeMidCap Shariah 10% Capped Index.** Index constituents are rebalanced and capped, if necessary, on a quarterly basis, effective prior to the open of the Monday following the third Friday of March, June, September and December. The reference date for prices used for the weighting process is after the close of the Wednesday prior to the second Friday of the rebalancing month. Constituents' are weighted by float-adjusted market capitalization, subject to a cap of 10% of the total index weight.
- **S&P High Yield Dividend Aristocrats Shariah Index.** Constituents' weights flow through from the parent index, but with excess weight from non-compliant companies redistributed proportionally to all index components.

Index Maintenance

Updates due to changes in compliance are applied once a month at the open of trading of the Monday following the third Friday of each month. Spin-offs are added at a zero price at the market close of the day before the ex-date (with no divisor adjustment) and are removed after at least one day of regular way trading (with a divisor adjustment), regardless of Shariah compliance. Where applicable, all deletions from the parent index are deleted from the Shariah-compliant index on the same day.

Constituents of the S&P Shariah Indices are also constituents of the underlying S&P Dow Jones Indices' global indices. As such, specific changes to index constituents – such as share changes, IWF changes, dividend distributions, price adjustments, etc. – follow the policy of the respective regional index.

When a stock is replaced by another stock, the index divisor is adjusted so the change in index market value that results from the addition or deletion does not change the index level.

Corporate Actions

Please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

For more information on the index calculation methodology for the S&P Global Infrastructure Shariah Index, S&P Shariah Dividend Indices and S&P High Yield Dividend Aristocrats Shariah Index, please refer to the Non-Market Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

Investable Weight Factor (IWF)

Please refer to S&P Dow Jones Indices' Float Adjustment methodology for details on float adjustment and IWFs.

Currency, Currency Hedged, and Risk Control Indices

The indices are calculated in U.S. dollars as well as in the currency of calculation of their underlying indices. For example, the S&P Europe 350 Shariah and the S&P Japan 500 Shariah are calculated in euros and Japanese yen, respectively, in addition to U.S. dollars. The GCC indices are calculated in U.S. dollars as well as in the local currencies of the constituent countries.

WM/Reuters foreign exchange rates are taken daily at 4:00 PM London Time and used in the calculation of the indices. These mid-market fixings are calculated by The WM Company based on Reuters data and appear on Reuters pages WMRA.

For the S&P Japan 500 Shariah and the S&P/TOPIX 150 Shariah, real-time spot Forex rates, as supplied by Reuters, are used for ongoing index calculations. The end-of-day values of the indices are calculated using the real-time spot exchange rate provided by Reuters.

Additional currency, currency hedged, and risk control versions of the indices may be available. For a list of available currency, currency hedged, and risk control indices, please contact Client Services at index_services@spglobal.com.

For more information on currency, currency hedged, and risk control indices, please refer to S&P Dow Jones Indices' Index Mathematics Methodology.

Base Dates and History Availability

Index history availability, base dates and base values are shown in the table below.

Index	Launch Date	First Value Date	Base Date	Base Value
S&P 500 Shariah	12/19/2006	12/29/2000	12/29/2000	1000
S&P Europe 350 Shariah	12/19/2006	12/29/2000	12/29/2000	1000

S&P Global Infrastructure Shariah	10/29/2007	12/29/2006	12/31/2006	1000
S&P China LargeMidCap Shariah 10% Capped	11/26/2018	11/30/2007	11/30/2007	100

Index Data

Calculation Return Types

S&P Dow Jones Indices calculates multiple return types which vary based on the treatment of regular cash dividends. The classification of regular cash dividends is determined by S&P Dow Jones Indices.

- Price Return (PR) versions are calculated without adjustments for regular cash dividends.
- Gross Total Return (TR) versions reinvest regular cash dividends at the close on the ex-date without consideration for withholding taxes.
- Net Total Return (NTR) versions, if available, reinvest regular cash dividends at the close on the ex-date after the deduction of applicable withholding taxes.

In the event there are no regular cash dividends on the ex-date, the daily performance of all three indices will be identical.

For a complete list of indices available, please refer to the daily index levels file (“.SDL”).

For more information on the classification of regular versus special cash dividends as well as the tax rates used in the calculation of net return, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices Methodology.

For more information on the calculation of return types, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.

Index Governance

Index Committee

Each of S&P Dow Jones Indices' global indices is the responsibility of an Index Committee that monitors overall policy guidelines and methodologies, as well as additions to and deletions from these indices. The Index Committee is composed of S&P Dow Jones Indices' staff specialized in the various regional equity markets. In some cases, regional Index Committees include non-S&P Dow Jones Indices' staff as minority members.

Decisions made by the Index Committee include all matters relating to index construction and maintenance. The Index Committee meets regularly to review market developments, and convenes as needed to address major corporate actions.

It is the sole responsibility of the Index Committee to decide on all matters relating to methodology, maintenance, constituent selection and index procedures. The Index Committee makes decisions based on all publicly available information and discussions are kept confidential to avoid any unnecessary impact on market trading. As the numbers of companies in the S&P Dow Jones Indices' global indices are often fixed, constituent changes are generally driven by mergers and acquisitions activities or the impairment of a stock's ability to reflect the market, due to a substantial change in size or liquidity.

S&P Dow Jones Indices' Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to the daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews the methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Index Policy

Announcements

All index constituents are evaluated daily for data needed to calculate index levels and returns. All events affecting the daily index calculation are typically announced in advance via the Index Corporate Events report (.SDE), delivered daily to all clients. Any unusual treatment of a corporate action or short notice of an event may be communicated via email to clients.

Pro-forma Files

In addition to the corporate events file (.SDE), S&P Dow Jones Indices provides constituent pro-forma files for select indices each time the indices rebalance. The pro-forma file is typically provided daily in advance of the rebalancing date and it contains all constituents and their corresponding weights and index shares effective for the upcoming rebalancing. Since index shares are assigned based on prices nine calendar days prior to the rebalancing, the actual weight of each stock at the rebalancing differs from these weights due to market movements.

Please visit www.spdji.com for a complete schedule of rebalancing timelines and pro-forma delivery times.

Holiday Schedule

Single country indices (e.g. S&P 500 Shariah, S&P Japan 500 Shariah) follow the national holiday schedule in each country. The S&P Europe 350 Shariah is calculated on all days of the year except when all the component markets are closed.

A complete holiday schedule for the year is available on S&P Dow Jones Indices' Web site at www.spdji.com.

Rebalancing

The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on or around the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

Unexpected Exchange Closures

For information on Unexpected Exchange Closures, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Recalculation Policy

For information on the recalculation policy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Contact Information

For questions regarding an index, please contact: index_services@spglobal.com.

Index Dissemination

Daily index values, corporate actions, index weights and portfolios can be received via S&P Dow Jones Indices' FTP site.

Tickers

The tables below lists headline indices covered by this document. All currency, currency hedged, risk control, and return type versions of the below indices that may exist are also covered by this document. Please contact index_services@spglobal.com for a complete list of indices covered by this document.

Appendix

Methodology Changes

Methodology changes since January 1, 2015 are as follows:

Change	Effective Date (After Close)	Methodology	
		Previous	Updated
S&P Pan Arab Composite Shariah Dividend Index: Country Representation	08/01/2016	--	To ensure full regional representation in the index, if there are no eligible constituents for a member country, the eligibility requirements for that country are relaxed as follows: <ul style="list-style-type: none"> • The requirement to maintain stable or increasing dividends is reduced from three years to two. • If, following the above rule relaxation there are still no eligible constituents, the three month ADVT requirement is reduced from US\$ 0.2 million to US\$ 0.1 million. • If, following the above rule relaxations, there are still no eligible constituents from an unrepresented country, no further relaxations will be made and the country will remain unrepresented in the index.
S&P Shariah Dividend Indices: Rebalancing Schedule	08/01/2016	The indices are rebalanced semi-annually in January and July, and are reviewed in April and October.	The indices are rebalanced annually in July, and are reviewed in January, April and October.
S&P Shariah Dividend Indices: Constituent Selection Buffers	08/01/2016	If a current index constituent of an S&P Shariah Dividend Index is among the top 40 ranking stocks by indicated annual dividend yield during the index rebalancing, the stock remains in the index.	If a current index constituent of an S&P Shariah Dividend Index is among the top 35 ranking stocks by indicated annual dividend yield during the index rebalancing, the stock remains in the index (i.e., a 35 stock buffer). Conversely, a non-constituent stock ranking among the top 25 will replace the lowest-ranked current constituent.

These trademarks together with others have been licensed to S&P Dow Jones Indices LLC. Redistribution or reproduction in whole or in part are prohibited without written permission of S&P Dow Jones Indices LLC. This document does not constitute an offer of services in jurisdictions where S&P Dow Jones Indices LLC, S&P, Dow Jones or their respective affiliates (collectively "S&P Dow Jones Indices") do not have the necessary licenses. Except for certain custom index calculation services, all information provided by S&P Dow Jones Indices is impersonal and not tailored to the needs of any person, entity or group of persons. S&P Dow Jones Indices receives compensation in connection with licensing its indices to third parties and providing custom calculation services. Past performance of an index is not an indication or guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments based on that index. S&P Dow Jones Indices does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P Dow Jones Indices makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. S&P Dow Jones Indices LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of the Content even if advised of the possibility of such damages.

S&P Global keeps certain activities of its various divisions and business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate or otherwise address.

The Global Industry Classification Standard (GICS®) was developed by and is the exclusive property and a trademark of S&P and MSCI. Neither MSCI, S&P nor any other party involved in making or compiling any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.
